

About DA-SOFT Technologies

Nov 03, 2007

The Brief

DA-SOFT Technologies is a privately held company, specializing in:

- producing of high-velocity data access software libraries for Delphi, C++Builder and FreePascal;
- producing of software tools for Oracle, MS SQL Server, Firebird database application developers;
- data access solutions consulting;
- custom applications development;
- producing Oracle Server, Microsoft SQL Server and CodeGear Delphi training courses.

Founded in 1999, DA-SOFT Technologies delivers unique tools that help software developers build rock-solid database software applications.

Our flagship product, AnyDAC, utilizes unique programming principles making it the best and fastest data access component library for Embarcadero Delphi. Since launch of FreeDAC in 2004, and later evolved into AnyDAC, we have gained confidence of several thousands developers World-wide, who are now using our data access software to build their database applications.

Working on outsourced to us projects, we helped our customers to make their software libraries and tools the best in their segments. Few names - PL/SQL Developer, Quest Code Tester for Oracle, Connect for SAP, Saphir.

DA-SOFT Technologies is available for partnerships and collaborations. Our employees will be pleased to help you with any questions you might have about our products or our services.

The Partners

We are partners of:

CodeGear

CodeGear delivers innovative, high productivity development tools for a wide spectrum of software developers ranging from individuals to enterprise teams. The company flagman products are Codegear RAD Studio, Codegear Delphi and C++ Builder.

DA-SOFT Technologies at CodeGear

MySQL AB

MySQL AB develops and markets a family of high performance, affordable database servers and tools. MySQL contributes to building the mission-critical, high-volume systems and products worldwide. The flagman products are MySQL Enterprise Server and MySQL Community Server.

DA-SOFT Technologies at MySQL AB

The Firebird database engine has a strong following amongst the developer and user communities. Firebird Foundation is an organisation of these individuals and companies of various sizes, working together as parts of a non-profit organisation that aims to ensure the continued development of the open source Firebird relational database and related products.

StreamSec

StreamSec is a Swedish company founded in 2000. The company's main business is to develop the security library StreamSec Tools for Delphi, and to provide consultancy services related to security development in Delphi.

StreamSec has kindly donated the encryption routines used by AnyDAC, including SQLite driver. We recommend that customers with more specific security requirements turn to StreamSec for help to build a custom made encryption scheme.

TMS Software

TMS Software provides productivity software building blocks for VCL, IntraWeb, ASP.NET and Silverlight.

TMS Software, experts in GUI, helps us to create the excellent modern looking graphic interfaces for the DA-SOFT Technologies products. Both companies are working together to provide advanced database integration for the TMS DB-aware products and tools, at first for TMS Grid Pack.
